"WHERE DID THE FUEL GO?"

Track fuel usage from bulk tanks, to slip tanks, to vehicles and equipment.

FUEL TRACKER is a free tool for Christensen customers that makes job-costing easier. It can also help prevent fuel misuse, identify fuel theft, and reduce errors from manual recording and reporting. Admin teams can see transactions and pull reports 24/7/365.

SMART LABELING
All tanks and equipment receive a weather-proof Christensen label with a unique QR code.

MOBILE TRACKING
Using any smartphone, employees simply open the Christensen app to scan the QR code on the bulk or slip tank.
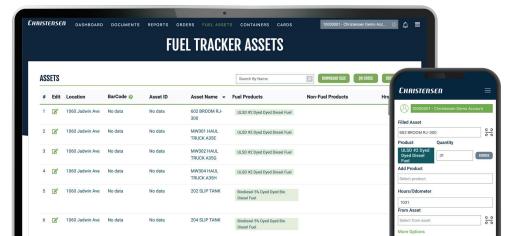

RECORD TRANSACTIONS
Select the vehicle or piece of equipment the fuel is being transferred to, and record the total gallons transferred. The employee's job is done!

VIEW REPORTS
Now, you or your admin team can instantly see all fuel transactions and pull usage reports in the Christensen Portal under "Reports".
