

PRECISION LUBE MANAGEMENT

Reduce downtime and costly repairs by tracking lubricant consumption, giving you the ability to proactively maintain your equipment.

LUBE TRACKER is a free tool for Christensen customers, designed to help companies track the filling and emptying of any liquid products to and from containers.

EASY SETUP

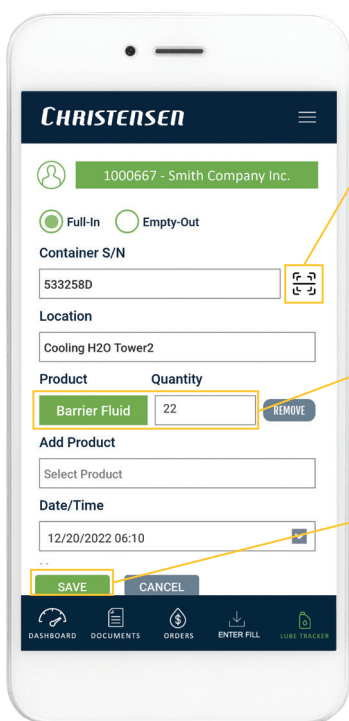

Apply the QR code labels to all totes and containers that you want to track.

Visit the “Assets” tab in the Christensen app and assign each asset a name, size, and location.

Ensure your team has installed the Christensen app and grant them the necessary access level in the customer portal.

HOW TO USE

Scan the bulk or primary container using any smartphone with the Christensen app. You can monitor the designated container(s) during product relocation for seamless tracking.

Enter the fill quantity and choose the product. After the initial fill, the product is auto-remembered for future use.

Enter hours or odometer and click “Save”.

Check all transactions effortlessly with complete transparency. Simply access the Christensen customer portal on your desktop and head to the “Reports” tab.

REPORTS				
11/20/2022 to 12/20/2022				
Product	Delivered Qty	Qty Out	Retain	Qty Consumed
Barrier Fluid	1.00	22.00	3.00	19.00
Corena s4 p68	1.00	22.00	0.00	0.00

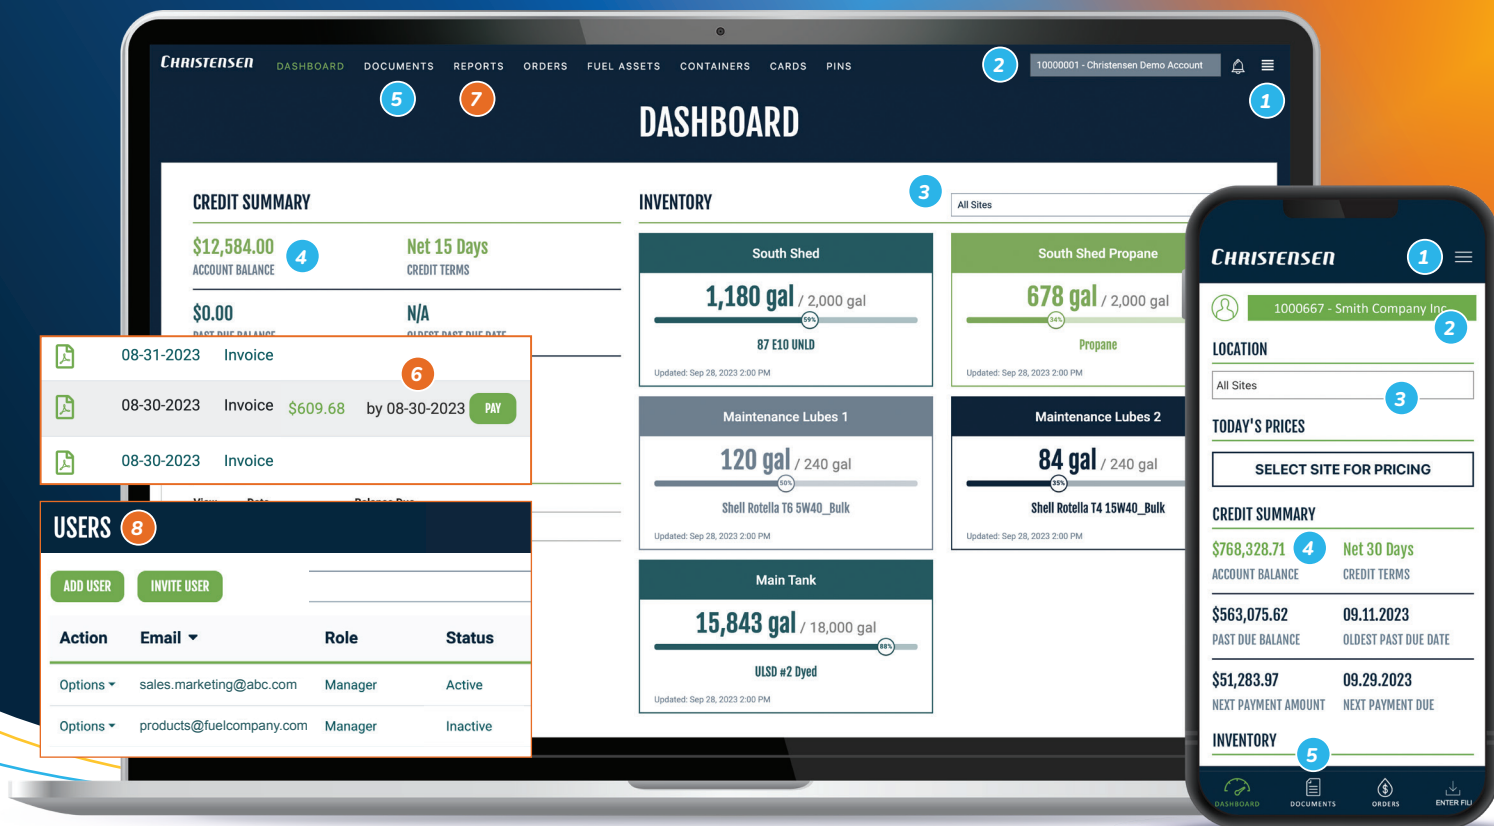

Got questions? We have answers!

Contact the Christensen team or your dedicated Account Manager to learn more, or get setup with Lube Tracker.
